ABOUT AERÉ MARINE GROUP

AERÉ Marine Group was founded in 1998 as PRAKTEK, Inc., a company focused on developing and implementing “practical technology” products. Headquartered in Coral Springs, Florida, we are known worldwide for our innovative products for the marine industry. In 2014, we re-branded the company into three distinct product divisions: AERÉ Docking Solutions, AERÉ Fire Solutions and AERÉ Marina Solutions.

We are proud to be a family-owned manufacturing business and are active members of marine industry associations such as the U.S. Superyacht Association (USSA), National Marine Manufacturers Association (NMMA) and the Marine Industries Association of South Florida (MIASF). The staff of AERÉ Marine Group is ready and available to assist you with all your docking and fender needs.

AERÉ DOCKING SOLUTIONS

AERÉ Docking Solutions features our signature product lines, AERÉ Inflatable Fenders, Fenda-Sox Fender Covers and AERÉ Inflatable Docks. AERÉ Inflatable Fenders are the premier fender product of the yachting industry and sold through a worldwide network of dealers and at major boat shows annually. There are over 40 sizes and types of AERÉ Inflatable fenders—to protect any size or type of vessel for recreational, commercial or military use.

Fenda-Sox Fender Covers, made in a proprietary marine knit fabric, and our Fenda-Sox NEO Covers, are manufactured for all fender product lines in our factory in South Florida. Fenda-Sox covers are available in 10 standard colors, with NEO covers in Black and Navy only. Full embroidery service is also available on any Fenda-Sox or NEO Fender Cover.

AERÉ Inflatable Docks and Platforms include Jet Ski Docks, 2 sizes of Work Platforms and Inflatable Docking Systems for vessel and/or marine use. Custom configured inflatable stern protection systems and dock layouts are also available.

AERÉ FIRE SOLUTIONS

AERÉ Fire Solutions features the full line of FireAde and Enforcer One “green” fire extinguishing products available for marine use. These products, manufactured in the USA, are environmentally-friendly, biodegradable and easy to use. Although new to the marine industry, FireAde and Enforcer One products are in use by fire departments, military organizations and automotive racing. These unique products have been manufactured and proven for over 30 years.

AERÉ MARINA SOLUTIONS

AERÉ Marina Solutions is the exclusive distributor for the InMare line of docking products for North America. InMare products are manufactured in Italy and are available in numerous types and shapes for any marina project, from your personal dock to a full multi-slip marina.

AERÉ DOCKING SOLUTIONS

Premier Protection

AERÉ Inflatable Fenders were introduced in 1999 and remain the most requested inflatable fender product in the marine industry. From the weekend boater to the mega-yacht owner, AERÉ Docking Solutions has a size and type of inflatable fender for any docking situation.

Made to Last

AERÉ Inflatable Fenders are the only fenders manufactured through a proprietary process of welded seams with hand-glued reinforcements for extra strength and durability. AERÉ Inflatable Fenders are the toughest on the market and will protect your vessel from docking damage.

6-Year Warranty

All AERÉ Inflatable Fenders are protected by a Six-Year Manufacturer’s Warranty Program. If you have any issue, contact our Service Department in Florida or one of our international service centers and we will take care of you. Customer satisfaction is guaranteed.

Custom Projects

AERÉ Docking Solutions has the ability to handle any docking issue including the design and manufacturing of custom inflatable products. Just ask AERÉ to address the issue and we will design a solution for you!

Custom Inflatable Projects

AERÉ Builds Your Solution

Custom Solutions from AERÉ

Contact AERÉ when you need a customized solution for your vessel. Whether you need a custom inflatable dock layout or custom-sized inflatable fenders, AERÉ can handle your project.

We pride ourselves on outstanding customer service and will build to your specifications.

Fenda-Sox

The Original and Still the Best

AERÉ Marine Group acquired Fenda-Sox in 2008 and moved the UK-based company to south Florida. Now, all-American made from locally sourced raw materials, Fenda-Sox are available for all manufacturers’ fender products. This proprietary knit was developed for marine use and has additional UV protection added when the yarn is dyed for extra coverage.

Protect your boat’s finish with Fenda-Sox fender covers!

Colors and Selection

Fenda-Sox are available in 9 standard colors: black, navy blue, grey, green, royal blue, red, burgundy, sand and brown. Custom yarn colors are available.

Custom Embroidery

We have the ability to customize your Fenda-Sox with your boat name or logo and can match your design for the true custom look.

Fenda-Sox NEO

Fenda-Sox NEO covers were introduced in 2014 to rave reviews and have quickly become the standard for larger vessels. The neoprene fabric is light-weight and will protect the vessel’s finish. Fenda-Sox NEO will not “wick up” water and will not sag if left in the water for an extended duration. Extra UV protection has been added to the fabric to extend sun-fade resistance.

Protect your boat’s finish with Fenda-Sox NEO fender covers!

Colors and Selection

Fenda-Sox NEO covers are available in black and navy blue for all manufacturers’ fender products. Custom colors are available.

Custom Embroidery

We have the ability to customize your Fenda-Sox with your boat name or logo. We can also print utilizing sublimation printing techniques for the truly ultimate fender cover.

AERÉ FIRE SOLUTIONS

Premier Protection

AERÉ Marine Group is proud to distribute FireAde 2000 and Enforcer products to the marine industry world-wide. Although recently introduced to the marine industry, these products are currently in use by fire departments, military organizations and auto racing. These unique “green” firefighting products have been manufactured in the USA and proven in use world-wide for over 30 years.

Green Agent Technology

FireAde and Enforcer products are environmentally formulated with 98% organic compounds. They contain no PFOA or PFOS nor hazardous chemicals and are biodegradable.

Certifications

FireAde and Enforcer products are certified by Underwriters Laboratory (UL), Insurance Services Organization (ISO), USDA and the U.S. Navy. These products offer the simplicity of using one foam-based product to extinguish multiple classifications of fires.

Easy to Use

FireAde and Enforcer products are easy to use and have an unlimited shelf life. The products are available in sizes and delivery methods for uses from galley to commercial marina.

Loaded Weight: 985 pounds

AERÉ MARINA SOLUTIONS

Premier Marina Protection

AERÉ Marine Group is proud to distribute dock and marina fenders made in Italy by Inmare. Inmare products are made from a special EVA foam compound that is non-toxic and environmentally friendly. It is UV resistant, will not scratch or mark the vessel and is long-lasting, even in the tough marine environment. Due to the high flexibility of these products, they will remold to their original shape even after heavy compression.

Another Solution

Through its partnership with Inmare, AERÉ Marine Group can offer unique solutions to any marina or docking problem. Whether it's a piling at a residential dock or hundreds of transient boat slips, we have the product and expertise for the job.

Contact our office for assistance in planning your next project.

Easy to Install

Most Inmare products are shipped with fasteners for easy installation on your site.

Popular Products:

Piling Fender

L 31.5" X H 17.7" X D 1.2"

Built for permanent or portable installation on pilings. Single for low tidal latitudes and double for high tidal latitudes. Rated for boats up to 65' and 66 tons.

Bend Fender

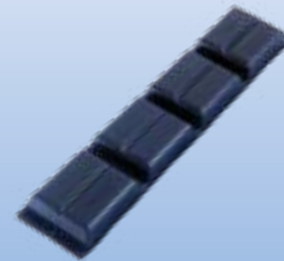

L 11.8" X H 4.3" X D 6.9"

Built for corners of fixed and floating finger piers where space is limited but maximum protection is required. Rated for boats up to 52' and 22 tons.

Doppio Zero

L 39.4" X H 8" X D 2.8"

Built to protect wide surfaces with a minimal profile to save space. Designed to use around outside and inside corners. Rated for boats up to 98' and 110 tons.
