Extruders Ltd.

plastex

Our Mission *A Mat for All Reasons*

Our mission is to add to our distributors, and in turn their customers, profitability, safety, productivity and style by designing and manufacturing cutting edge matting for all work, education and leisure environments.

Our Values

Founded in 1962, Plastic Extruders Ltd (Plastex) are a second generation family run firm with long serving employees who take personal responsibility for maintaining the highest service standards and delivering the right solution on time and on budget.

Working with you to meet your needs

- Through our design and innovation programme we work with our customers to constantly improve the form, function and cost effectiveness of our products.

So, though we have an extensive range suitable for most applications, we often fulfill individual customer needs by producing bespoke solutions. If you feel you may have one we would be pleased to hear from you. ”

PETER O'SULLIVAN
Sales Director

DAVID O'SULLIVAN
Managing Director

Plastic Extruders Ltd UK & Plastex Matting Inc USA

Follow **Plastex Matting** on:

Plastex *and the environment*

As a global supplier with manufacturing plants in the UK and the USA, we constantly seek to reduce the environmental impact of our manufacturing processes. For example all our black matting is made with up to 100% post-industrial recycled material, but always with a minimum content of 30%.

To further minimise impact and avoid waste, we don't throw away any materials. All our factory trimmings and production process scrap are re-used in our own production. We do not re-sell any material to 3rd party reproprocessors.

In compliance with REACH regulation

The 2007 European Community REACH regulation (Registration, Evaluation, Authorisation and Restriction of Chemicals) gives manufacturers the responsibility of providing high level human and environmental protection from the use of chemicals in manufacturing.

Plastex does not use any substances currently included on the SVHC (Substances of Very High Concern) list under REACH, including "DEHP" Di(2-ethylhexyl) phthalate, also known as Di-octyl phthalate (DOP), plasticiser.

Further information can be found at www.plastexmatting.com.

Matting & flooring
manufactured in Europe
and the USA.

- Distributed worldwide

We make our matting, and that makes all the difference

When you buy Plastex matting you're also buying our extensive know-how that comes from over 55 years of designing, testing and manufacturing matting solutions for a diverse range of applications; knowledge we apply to make sure we find exactly the right solution for you.

This is important as an incorrectly specified product may actually increase risk. For example using a mat designed for bare feet in a workplace area could potentially increase slip accidents.

Talk to Us

To make sure you get the right mat for the right reasons, talk to us and our distributors.

Ensure you have been supplied
with a genuine Plastex product

To avoid plagiarism, today we emboss the trademarked names on the underside of our grid matting.

Testing
and Measurement

In our constant pursuit of excellence, we subject our products to the rigors of scientific testing. This includes external testing through international bodies, but we don't stop there. If an external test doesn't exist, we will commission a University research project. Plastex continually strive to ensure we maintain the highest standards expected by our customers worldwide.

Plastex

Three levels of service

Once we've established your exact need, we'll recommend the product that is right for you, from our three levels of service.

General Purpose

We have an extensive range of general purpose matting designed for various environments. So whether you're looking for comfort, slip resistance, soil removal or increased hygiene, we will have the product for you.

Specialist

We have also built up a full range of products for demanding specialist environments such as light and heavy industrial, as well as food preparation both big and small.

Bespoke

If we can't exactly meet your needs from our current range, we will design and manufacture a mat specifically for you.

Whatever your requirements we will put all our knowledge and care into delivering exactly the mat you need, on time and on budget - 'A mat for all reasons'.

To make it easier for you to choose the right mat for the right reason, we have divided our range into the sections below.

Why Slip Resistant Matting?

Statistics issued by the UK's HSE (Health & Safety Executive) show slipping and tripping to be the single most common cause of injuries in the UK workplace. These statistics are consistent in most markets globally confirming slips, trips and falls being the major workplace hazard.

Our slip resistant matting products are specifically designed to:

- **Improve safety underfoot**
- **Reduce slip, trip and fall accidents**
- **Remove spillages and debris from the working area**

Plastex slip resistant matting range features a combination of PVC construction, etched surfaces for improved slip resistance, animal fat and oil resistant properties, 100% recycled PVC products and many more...

Which Plastex product is right for you?

The chart below will help you choose the right mat for the right reasons, but if you have any questions contact us - we'll be delighted to help.

PRODUCT	SLIP RESISTANCE	WEAR	COMFORT	DRAINAGE/ SPILLAGE	SITUATION	USAGE
GENERAL PURPOSE						
Vynagrip Vynagrip Plus Vynagrip Modules p. 8-10						Hard wearing, heavy usage, long term
Heronair p. 11						Cushions against breakages, good general purpose
Floorline p. 12						Ideal for light usage and cushioning
Plastex Chex p. 16						For coverage of large areas
Plastex Lok p. 17						For coverage of large areas with likelihood of spillage
Trackgrip p. 18						Hard wearing, large debris, long term
WORKSHOP / TOOL ROOM						
Flexigrid p. 14						Larger components, debris, swarf and heavy spillage
Firmagrip p. 15						Close spaced grid, smaller components and wheeled traffic
FOOD PROCESSING / KITCHENS						
Herongripa p. 13						Large format grid for intensive food processing

INSIDE OR OUT, CLEAN OR NOT

The ultimate slip resistant matting solution

Automatic drainage combined with an extra 'aggressive' diamond tread for increased slip resistance make Vynagrip especially effective wherever oil, water, liquid and debris spillages are likely.

Increase safety, comfort and productivity in the workplace with Vynagrip. Vynagrip offers a slip resistant, anti-fatigue matting solution which can be relied upon to perform in wide ranging heavy duty commercial and industrial applications.

Vynagrip is made from 2 layers of non-porous, flexible PVC that are welded together to create extra strong joints. It is available in rolls or modules with accessories to suit all needs (see page 19).

BENEFITS

Certified slip resistance	DIN 51130: R11 - ASTM 1677: 0.7/0.6
Excellent drainage	DIN 51130: V10
Chemical, oil and acid resistant	
Environmentally-friendly	
Easy to cut on site, contours to uneven surfaces	
Quick to install	
Boost productivity	
Fire resistant	

FEATURES

Diamond cut pattern
Two layer construction
Non-porous PVC (impermeable to fluids)
Black Vynagrip: 100% recycled material
Made from flexible PVC
Supplied in 10m rolls or ramped modules
Proven and tested anti-fatigue properties
Certified EN 13501: Cfl - S1

VYNAGRIP PLUS

A slip resistant matting with yellow bands

A hard wearing PVC grid matting to mark routes and delineate areas.

With the same specifications as Vynagrip, a slip resistant, anti-fatigue matting solution which can be relied upon to perform in wide ranging heavy duty commercial and industrial applications, Vynagrip Plus matting has additional yellow bands for extra safety and demarcation.

The matting is made from 2 layers of non-porous, flexible PVC that are welded together to create extra strong joints. It is available in rolls with accessories to suit all needs.

VYNAGRIP MODULES

Reducing slips and standing fatigue at work

Hard wearing PVC grid matting modules providing comfort and slip resistance.

Vynagrip matting is also available in standard size modules with fitted edging on 3 sides, to identify work area and prevent trip hazard, so as to fit snugly against work stations.

Vynagrip is made from 2 layers of non-porous, flexible PVC that are welded together to create extra strong joints. Its diamond tread surface and proven anti-fatigue properties make it one of the most suited mats for reducing standing fatigue, whilst

A hardwearing and versatile work horse

Heronair is an economical, tubular constructed matting for general purpose applications that provides excellent slip resistance and insulation.

Heronair's hollow construction uses less material, so it is also light to move and easy to lift for cleaning purposes.

It is especially effective wherever there is a risk of water and spillages underfoot as it is also highly slip resistant (RII under DIN 51130 testing).

BENEFITS

Certified slip resistance **DIN 51130: RII - ASTM 1677: 0.6/0.6**

FLOORLINE

Light, economical and comfortable

Economical and multi-purpose, Floorline matting has wide ranging uses in light industrial and commercial applications where an attractive, slip resistant and cushioned matting is required.

The cushioning effect of Floorline reduces the risk of damage to items that are accidentally dropped whilst its open grid format dissipates spillages and permits easy drainage.

This effective combination makes Floorline a popular matting for clubs, restaurants, bars and hospitality areas where staff have to stand, spills are likely and breakages possible.

BENEFITS

Certified slip resistance **DIN 51130: R11 & C ASTM 1677: 0.6/0.5**

Vinyl matting resistant to animal fat and oils

Developed primarily for the food processing and preparation industries, Herongripa is a specialised vinyl matting solution, which is hygienic and animal fat resistant.

The wide spaced open grid format allows waste and spillages to fall through, keeping the standing area free of slippery and potentially hazardous matter. The one piece hardwearing vinyl roll format allows for ease of rolling up during cleaning routines.

BENEFITS

Certified slip resistance **DIN 51130: R11**

Excellent drainage **DIN 51130: V10**

Tough at work, gentle on the environment

For the toughest industrial applications where high levels of liquids and debris are generated by manufacturing and production processes.

Combining a higher profile with an open grid and an aggressive grip surface, Flexigrid delivers slip resistance and drainage where spillage, debris and metal shards are an issue.

BENEFITS

Certified slip resistance **DIN 51130: R11 - ASTM 1677: 0.6/0.5**

Close mesh matting for small wheeled traffic

For busy industrial areas where trolleys and small-wheeled vehicles are in use and liquids may be liable to be spilled.

Firmagrip is a quality close mesh matting that is dense enough to prevent smaller components falling through, yet is so effective at drainage it carries the highest certification. Add to that excellent slip resistance and you've got a real winner.

BENEFITS

- Certified slip resistance **DIN 51130:RII**
- Excellent drainage **DIN 51130:V10**
- Ideal for small wheeled traffic
- Chemical, oil and acid resistant

TRACKGRIP

Wider spaced grid slip resistant matting

For greasy and grimy environments.

This highly slip resistant matting is very effective wherever oils or greasy materials are spilled. A wide grid design allows for better drainage and fall through, keeping the surface free from potentially dangerous slip hazards. Specialist matting solution developed for railway maintenance areas, especially pits below carriages.

BENEFITS

Certified slip resistance **DIN 51130: R11**
 Excellent drainage
 Chemical, oil and acid resistant

Plastex Chex

12mm x 50mm x 500mm
(1/2" x 2" x 1'8")

50mm PVC edging strip

Supplied in 50cm (1'8") lengths.

Colours: Black, Yellow

Plastex Lok

12mm x 50mm x 500mm
(1/2" x 2" x 1'8")

50mm PVC edging strip

Male and female strips available.

Supplied in 500mm lengths (1'8").

Colours: Black, Yellow

12mm x 50mm x 50mm
(1/2" x 2" x 2")

50mm PVC edge corner

Colours: Black, Yellow

Connector clips - end to end

For joining two ends of the edging together. One lug is supplied for every two pieces of edging in the relevant colour.

Colours: Black, Yellow

Why anti-fatigue matting?

Half the UK workforce stand or walk for more than 4 hours per day using 20% more energy than their seated colleagues. These statistics are consistent in most markets globally, confirming that fatigue and resultant productivity reductions are a major workplace problem. Employers that provide high quality underfoot comfort will:

- **Improve concentration**
- **Decrease risk of circulatory problems**
- **Improve productivity**
- **Decrease injury risk**

The patented foam used in Zedland, ZedTred and Zed Chex provides excellent standing fatigue reduction, hard wearing and continued resilience long after less expensive foam matting will have deadened.

Which Plastex product is right for you?

The chart below will help you choose the right mat for the right reasons, but if you have any questions contact us - we'll be delighted to help.

PRODUCT	SLIP RESISTANCE	WEAR	BOUNCE/FATIGUE REDUCTION	DRAINAGE/ SPILLAGE	SITUATION	USAGE
GENERAL PURPOSE - Suitable for most dry applications						
Tuff Spun p. 23				Dry only		The best budget anti-fatigue matting available with yellow edging for safety
Tuff Spun Wear p. 24				Dry only		Added wear layer offers extra comfort and improved durability
Tuff Spun Deck p. 25				Dry only		Checker plate foam for added traction and puncture resistance
Zed Land p. 26				Dry only		The ultimate high bounce, long lasting general purpose anti-fatigue mat
HEAVY DUTY - Strengthened with extra thermally bonded surface matting						
Zed Tred p. 27						Copes with light spillage and debris
Zed Chex p. 28						Industry standard pattern - available in black
FOR WHEN THE HEAT IS ON						
Sparksafe p. 29				Dry only		Industrial work and welding stations, repels sparks and hot metal shards
GENERAL PURPOSE - Suitable for most wet applications						
Heronair p. 30						Cushions against breakages, good general purpose

Why is anti-fatigue matting important?

Apart from the need for comfort and grip, standing relatively still at a work station can cause circulatory problems leading to increased fatigue, which may result in accidents and/or breakage.

How Plastex anti-fatigue matting works

With its bonded combination of a durable surface and foam backing, Plastex anti-fatigue matting is the ideal mix of safety and comfort. The surface patterns provide varying degrees of grip and drainage to cover the full range of need from light duty to heavy industrial use. As well as insulating and softening cold hard floors, the foam backing encourages micro muscle movements that improve blood flow preventing fatigue and potential long term health issues.

Floor areas large and small

Our matting is available in tile and roll format which means it perfectly suits large floor areas, runners alongside production lines or single modular mats for individual work stations. For more complex areas the matting is easy to cut to shape.

Module examples

Bevelled edges

All standard modules and rolls are supplied with ramped edging to 4 sides. Dual layer products can be cut to specific size with ramped edging fabricated on site.

The golf ball bounce test

For a low tech version of our bounce test simply hold a golf ball about 30cm (1') or so above one of our anti-fatigue mats and let go - the higher the bounce the more resilience and comfort the mat will provide.

TUFF SPUN

An economical anti-fatigue foam matting

REACH compliant closed cell matting in PVC foam composition for light duty use.

A good value, hard working, anti-fatigue matting with a ribbed slip resistant surface, Tuff Spun also reduces impact noise and protects items accidentally dropped.

BENEFITS

Certified wear resistance **ASTM 4060**: <1 gram loss

Good slip resistance

Reduces standing fatigue and underfoot noise and protects items accidentally dropped from damage

Quick to install

FEATURES

Minimal wear standing foam which will not deaden

Ribbed surface

Closed cell PVC foam construction

Supplied in 18m rolls or standard modules

TUFF SPUN WEAR

Heavy duty top layer for improved abrasion

Economical alternative for medium duty applications.

With an increased foam thickness of almost 50% on Tuff Spun, and incorporating a top surface wear layer, Tuff Spun Wear provides extra comfort and improved durability.

The anti-fatigue mat is suitable for most medium duty retail and commercial environments.

BENEFITS

Certified wear resistance **ASTM 4060:** <0.3 gram loss

Good slip resistance

Extra cushion comfort

Quick to install

FEATURES

Heavy duty top layer

Patented foam construction with ESD properties

Made from high molecular density foam with 'bounce' properties up to 4 times as effective as standard foam matting for improved comfort and productivity.

Standing employees working on Zed Land will feel better and have improved productivity. Dropped components will also be protected from accidental damage. Zed Land will not deaden and shows minimal wear after 2000 taber abrator cycles in test conditions to ASTM D4060.

BENEFITS

Certified wear resistance **ASTM 4060: $\leq 1.5\%$**
 Good slip resistance
 Excellent standing fatigue reducing properties will boost productivity
 Easy to cut to shape and quick to install
 Provide underfoot comfort in static sensitive environments

FEATURES

Minimal wear standing foam which will not deaden

SPARKSAFE

Textured heat repellent rubber top surface on a foam base

Repels sparks and hot metal fragments in industrial workplaces, welding stations, assembly areas, machine shops and wherever heat generating equipment is in use.

For the toughest conditions, when the heat is on, Sparksafe is a two part, all rubber constructed anti-fatigue matting with special heat repellent properties to withstand sparks and hot metal fragments.

BENEFITS

- High wear resistance and resilience
- Repels sparks and hot metal shards
- Excellent anti-fatigue relief
- Quick to install

FEATURES

- Rubber top with rubber foam backing
- Heat resistant rubber wear layer
- Soft foam base
- Supplied in standard modules

HERONAIR

An economical anti-fatigue matting

Very effective against breakages, Heronair provides excellent comfort and insulation.

A widely proven matting solution for light industrial applications where employees are standing in customer service positions, shop and canteen counters, packing lines, warehouses and the like.

Constructed with flexible PVC hollow ribs, hardwearing but lightweight, the matting has the added advantage of dissipating spillages and debris through its 10mm open grid and providing a slip resistant surface.

BENEFITS

Certified slip resistance **DIN 51130:RII - ASTM 1677: 0.6/0.6**

Excellent drainage **DIN 51130:V10**

Fatigue-reducing and insulating

Chemical, oil and acid resistant

Easy to cut on site, contours to uneven surfaces

Why Plastex barefoot & wetside matting?

All round safety, comfort and hygiene performance.

The combination of bare feet and water provides potentially high risk areas for slips. The humid environment with direct skin contact means continuous hygiene is crucial.

Our barefoot & wetside matting products are specifically designed to:

- **Reduce slip and fall accidents**
- **Avoid risks of fungal infections**
- **Provide underfoot comfort**

Plastex barefoot & wetside matting features a non-porous construction, excellent drainage, high slip resistance and permanent anti-microbial and anti-fungal options.

Supplied in either **loose laid rolls** or **interlocking tiles**.

Rolls are 10m long and **flexible in construction**, allowing ease of installation, one piece large covering and cutting to shape and size on site.

Which Plastex product is right for you?

The chart below will help you choose the right mat for the right reasons, but if you have any questions contact us - we'll be delighted to help.

PRODUCT	SLIP RESISTANCE	WEAR	HYGIENE	DRAINAGE	COMFORT	USAGE

Herontile p. 37						For large wet areas. Use inside only.
WET AREA IMPACT MATTING						
PillogriD p. 40						Phenomenal drainage with a soft landing.

HYGIENE, SAFETY & COMFORT -

INSIDE OR OUT

HERONRIB

Hygienic, comfortable, self draining barefoot matting

The ultimate sports and leisure matting for use in wet areas where barefoot traffic is extensive.

Made from strong, non-porous PVC with channelled underbars, Heronrib will automatically self drain even the largest amounts of water. It is therefore not only perfect to dissipate a splash but also for making a splash of colour around swimming pools, saunas, jacuzzis and other wet areas using one or more of Heronrib's eye-catching colours.

BENEFITS

Barefoot wet area tiling

For coverage of large floor areas seamlessly and easily.

It provides a hygienic, safe and attractive surface with permanent anti-fungal and antibacterial additives.

Herontile is made from an Ethylene Vinyl Acetate (EVA)* composition to guarantee softness and comfort. It also has a circular surface embossing for enhanced slip resistance and stands 15mm (5/8") high on strong support legs so that water disperses well underneath.

*Note: EVA is only suitable for indoor applications.

Four bright, stable and appealing colour options are complementary to interior schemes.

FLOORLINE

Light duty, residential, self draining safety

An economical and hygienic matting for light traffic changing areas and swimming pool surrounds.

Soft underfoot and decorative to look at, yet hardwearing in residential and lower traffic wetside areas, Floorline is an ideal matting solution which can be used where slip resistance is required both indoors and outdoors. Incorporates anti-microbial and anti-fungal additives for a continuous hygiene.

BENEFITS

FLOORLINE WATER POLO

The field marking matting

A quick field marking set-up and easily removed solution to increase visibility of the field lines whilst ensuring slip resistance.

Floorline Water Polo matting is very convenient to use at public polo sessions, being light, quick and easy to install and for subsequent storage.

In addition, it is supplied as a one piece tri-coloured 15m roll (green, yellow and red), acting as a field marking solution whilst ensuring continued safety underfoot for the referee even when the matting is wet.

BENEFITS

Cushioning matting for wave simulators

A large open grid and soft vinyl with hollow profile that combines phenomenal drainage with a soft landing.

Placed over metal grates at the back and front of surfing machines, PillogriD matting was specifically developed to provide excellent drainage and superior cushioning for aquatic safety.

Large roll format further adds to safety by removing the need for joints in action areas.

This matting can be supplied in factory welded panels for quick and easy installation.

BENEFITS

- Soft landing
- High volume drainage
- Highly resistant
- Easy to cut on site, contours to uneven surfaces
- Quick to install
- UV resistant
- Hard wearing
- Hygienic

FEATURES

- Hollow tube construction
- Large open grid format
- "D" profile for maximum weld strength
- Made from flexible PVC
- Supplied in rolls or fabricated panels
- Can be used indoor or outdoor
- All welded construction
- All flexible PVC construction

www.plastexmatting.com

Why is Entrance Flooring important?

Choosing the right entrance flooring matters for three good reasons:

- Style
- Health and Safety
- Cleanliness and Durability

Style

Your entrance flooring is, by definition, one of the first things clients and visitors see; so it plays a vital role in creating first impressions. As you'll see from the location pictures in this brochure our range of colours, custom logos, styles and tread patterns will make sure you get it right.

Health and Safety

Unfortunately, we live in a litigious age which is why it's good to know the Frontrunner entrance matting products are tested under DIN 51130 and achieved ratings as high as R12. This means they have been tested to be slip resistant at an angle of 27°, even when wet. This translates to peace of mind that your entrance flooring system is independently tested giving a performance safe entrance flooring. Additionally, the Frontrunner Entrance Flooring System conforms to the requirements of the BS 8300:2009 Design of buildings and their approaches to meet the needs of disabled people. Code of Practice.

Cleanliness and Durability

Up to 80% of dirt comes into your building on shoes or wheels. All Frontrunner entrance flooring is designed to remove, trap and hide this dirt from the traffic areas until it is easily removed during cleaning.

Our flooring deals with dirt so effectively that it will expand the life of your internal floor finishes and will help reduce your cleaning intervals. Frontrunner's one piece welded roll format ensures a durable and effective product. For further peace of mind, many of the installations shown in this brochure have been in place for ten years or more and still look as good as the day they were fitted.

Why Frontrunner Entrance Flooring System?

- 100% recyclable and REACH* compliant vinyl grid
- Meets the requirements of the UK Disability Discrimination Act - BS 8300:2009
- Excellent Fire rating - EN & ASTM
- Available in rolls for seamless, quick and easy installations
- Loose lay open grid construction removes dirt from traffic area and eases cleaning
- R12 slip resistance rating under DIN 51130 on Frontrunner XT and R11 rating on Frontrunner Entry, Frontrunner SB and Frontrunner SB+.
- Frontrunner Plus available in 50 different colour combinations. May also be customised with the incorporation of a logo panel.

ISO 9001 accredited
(since 1993) ensures
quality entrance
flooring systems that
are fit for purpose.

FRONTRUNNER ENTRANCE FLOORING SYSTEM

Vinyl Entrance Flooring System for high traffic areas

Recommended and Installed Worldwide for:

- Hotels • Hospitals • Industrial sites • Leisure facilities
- Office/Banks • Public buildings • Restaurants
- Retail locations • Schools • Supermarkets

Which Frontrunner Entrance Flooring System is right for you?

Depending on the surface you are looking to cover and amount of traffic, we recommend choosing a primary matting for effective removal of dirt and a secondary matting for removal of any residual dirt and drying of moisture.

FRONTRUNNER ENTRY

Open grid, slip resistant and heel-proof matting

A uniquely effective matting to help prevent dirt from entering buildings in high traffic internal areas.

Its aggressive diamond tread pattern scrapes dirt off shoes, whilst the 14mm (9/16") open grid structure allows it to fall out of the way. This efficient, high quality, 'scrape and clean' system also protects internal floor coverings and significantly reduces cleaning costs.

The special close space design of the open grid bars also allows the product to be heel proof and suitable for wheel chairs, shopping trolleys and other small wheeled traffic. Frontrunner Entry can be used in combination with other products from the Frontrunner Entrance Flooring System range for a complete interior and exterior entrance matting solution.

BENEFITS

Certified slip resistance **DIN 51130: R11** **ASTM 1677: 0.6/0.6**

Excellent drainage **DIN 51130: V10**

Fire resistant

Easy to maintain

Seamless, quick and easy installations

Easy to cut on site, contours to uneven surfaces

Heel and wheel-proof

Enhanced branding on styling

FEATURES

Diamond cut pattern

Two layer open grid construction

EN 13501 - 1 : 2007- Bfl - S1 **ASTM E648: Class I**

Can be rolled up for cleaning

Supplied in 10m (33') rolls - modules also available

Made from flexible PVC

Close mesh grid matting

5 standard grid colours

STANDARD COLOURS

DARK GREY

DARK BROWN

HOLLY GREEN

OXFORD BLUE

BLACK

Other colours available on request.

Frontrunner Entry Low Profile

A low profile 10.5mm (13/32") option that aligns with standard ceramic floor tiles and carpets in recessed applications. This can prevent creating a deeper matwell in an existing subfloor in order to accommodate the entrance matting system.

STANDARD SIZES

PRODUCT	HEIGHT	STANDARD ROLL OPTIONS*			STANDARD MODULE OPTIONS*		
Frontrunner Entry	14 - 16mm (9/16" - 5/8")	10 x 0.6m (33' x 2')	10 x 0.91m (33' x 3')	5 x 1.2m (16' x 3'11")	0.8 x 1.2m (2'7"x 3'11")	1 x 1.5m (3'3"x 4'11")	1.1 x 2m (3'7"x 6'7")
Low Profile	10.5 - 12mm (13/32" - 1/2")	10 x 0.6m (33' x 2')	10 x 0.91m (33' x 3')	5 x 1.2m (16' x 3'11")			

* Surface modules are supplied with factory fitted PVC ramped edging to four sides.

FRONTRUNNER XT

Extra slip resistant and heel-proof entrance matting

An entrance matting with a deeper etched tread for interior and exterior high traffic applications.

With all the features of Frontrunner Entry, Frontrunner XT has an extra aggressive, deep etched tread to give additional underfoot traction in outdoor applications and to remove the heaviest amounts of undershoe dirt and debris.

Frontrunner XT has therefore been successfully used where walkways and entrances are prone to becoming slippery and hazardous in wet conditions, and in particular on hardwood decking, bridges and general outdoor pedestrian areas.

BENEFITS

Certified slip resistance **DIN 51130: R12**

Excellent drainage **DIN 51130: V10**

Fire resistant

Easy to maintain

Seamless, quick and easy installations

Easy to cut on site, contours to uneven surfaces

Heel and wheel-proof

Enhanced branding or styling

* To ensure maximum flexibility and convenience, Frontrunner entrance matting system can be delivered in rolls or cut to size. Surface modules are also available in up to three standard sizes.

FRONTRUNNER BRUSH

Slip resistant entrance matting with brush inserts

For maximum moisture and dirt removal in external areas.

The brush strips with bristles will scour snow, mud and other heavy contaminants from the shoe, boot or wheel, keeping buildings dirt-free under the most extreme weather conditions.

Frontrunner Brush works as a 'stand alone' module or in combination with other Frontrunner Entrance Flooring Systems.

BENEFITS

- High soil removal and slip resistance
- Excellent drainage
- Excellent scraping
- Fire resistant
- Easy to maintain
- Seamless, quick and easy installations
- Easy to cut on site, contours to uneven surfaces

FEATURES

- Diamond cut pattern
- Two layer open grid construction
- Nylon brush inserts

** Surface modules are supplied with factory fitted PVC ramped edging to four sides.

FRONTRUNNER BRUSH WIDE

Extra wide grid matting with brush inserts

For large debris removal in external areas.

Icy/snowy winter months can be characterised by a lot of gravel, shingle or stones.

With similar properties to Frontrunner Brush, but with a wider grid that allows larger debris such as small stones to fall through and be contained.

It works either as a stand alone or can be interchanged with another Frontrunner system in summer months to provide the complete entrance solution.

BENEFITS

Ideal for removing salt, shingle or gravel

High soil removal and slip resistance

Excellent drainage

Excellent scraping

FRONTRUNNER PLUS

Open grid entrance matting with absorbent inserts

Maximum removal of residual dirt and moisture in high traffic internal areas.

Protects your internal floorings and reduces cleaning costs.

Frontrunner Plus, available in two heights, is an open grid vinyl construction is not only heel and wheel-chair friendly, but also effectively removes, retains and dries soil and moisture from underfoot thanks to its slip resistant surface and absorbent inserts. The positioning of the scraper bars on Frontrunner Entrance Flooring System can be varied to allow the incorporation of a logo panel. The system is of one-piece vinyl construction and is therefore both quiet underfoot and ideal for use in conjunction with under floor security systems.

BENEFITS

High soil removal & slip resistance
Excellent drainage
Maximum moisture removal
Fire resistant
Easy to maintain
Seamless, quick and easy installations
Easy to cut on site, contours to uneven surfaces
Heel and wheel-proof
Reduces the need of a deeper matwell
Enhanced branding or styling

** Surface modules are supplied with factory fitted PVC ramped edging to four sides.

Frontrunner Plus Low Profile

A low profile 10mm (13/32") option that aligns with standard ceramic floor tiles and carpets in recessed applications without the need to create a deeper matwell in an existing subfloor.

CUSTOM LOGOS

The positioning of the scraper bars on Fronrunner Entrance Flooring Systems can be varied to allow the incorporation of a logo panel.

Logo panels are achieved by die cutting with another compatible high quality absorbent insert, giving a permanent and colourfast message.

Logo panels run the width of the matwell and are either 30 or 45cm tall, providing a highly visible message in the all important 'first impression' area.

Fronrunner Entrance Systems incorporating logos can be supplied for recessed systems or surface mounted modular mats.

DESIGN COMBINATIONS

Frontrunner Plus is available in a choice of 5 grid colours and 10 coordinating absorbent insert colours. Shown below is each absorbent insert swatch with the most popular grid choice and the 5 alternative grid colours available.

FRONT RUNNER SB

Vinyl ribbed, solid backed entrance matting

Laid directly on top of sub-floor, Frontrunner SB, being 6.5mm thick, removes the need for a matwell and fits easily to the existing floor covering.

The matting's ribbed pattern scrapes dirt at the entrance area, which is effectively contained away from the traffic area. The solid backing and ribbed construction enable quick and effective vacuuming.

Frontrunner SB can also be used on top of current flooring with ramped edging to 2 sides to provide a slip resistant walkway.

BENEFITS

Certified slip resistance	DIN 51130: R11	ASTM C1028: 0.6/0.6
Fire resistant		
Surface mounted		
Can be adhered to sub-floor in high traffic areas		
Easy to cut on site, contours to uneven surfaces		
Seamless, quick and easy installations		
Light to handle		
Heel and wheel-proof		

FEATURES

Diamond cut pattern
Certified EN 13501 - I : 2007- Cfl - S1 ASTM E648: Class 2
6.5mm (17/64") grid height
Solid backing
Made from flexible PVC
Supplied in 10m (33') and 20m (66') rolls
One layer hollow construction
Close mesh grid matting

FRONTRUNNER SB+

Vinyl ribbed, solid backed entrance matting with carpet inserts

Without the need of a recessed matwell, Frontrunner SB+ cleans, scrapes and dries dirt and moisture at the entrance.

In addition to Frontrunner SB's ribbed pattern that scrapes dirt off shoes and solid back for containment of dirt, Frontrunner SB+ has added absorbent inserts with monofilament scrapers that remove moisture at the entrance.

Featuring a grid of 6.5mm thickness, Frontrunner SB+ can either be laid directly on top of sub-floor or be used on top of current flooring with ramped edging.

FLOORING SURFACE MODULES

Recessed Ancillaries

For recessed applications, a full range of frames and dividers are purposely designed to provide level and smooth transitions, and simple installations during actual entrance fit out. For full details visit www.plastexmatting.com/recessed-ancillaries.html

For left and right extremities of well to cap and secure ends of 14mm/10.5mm matting.

Used for left and right extremities of 10.5mm matting in conjunction with ceramic tiles.

Used as "an invisible divider" for front to back installations of 14mm/10.5mm matting.

For circular door and non-rectangular installations of 14mm matting.

A front to back frame or divider used with 14mm/10.5mm matting.

Frames of different widths used as dividers for large left to right installations of 14mm matting.

For left and right extremities of well to cap and secure ends of 14mm matting when against a wall.

Aluminium frames are available in natural anodised finish. For design elegance and colour continuity, the U, R and T frames are also available in dark grey and black. Edge J, in rigid PVC, is available in Dark Grey or Black.

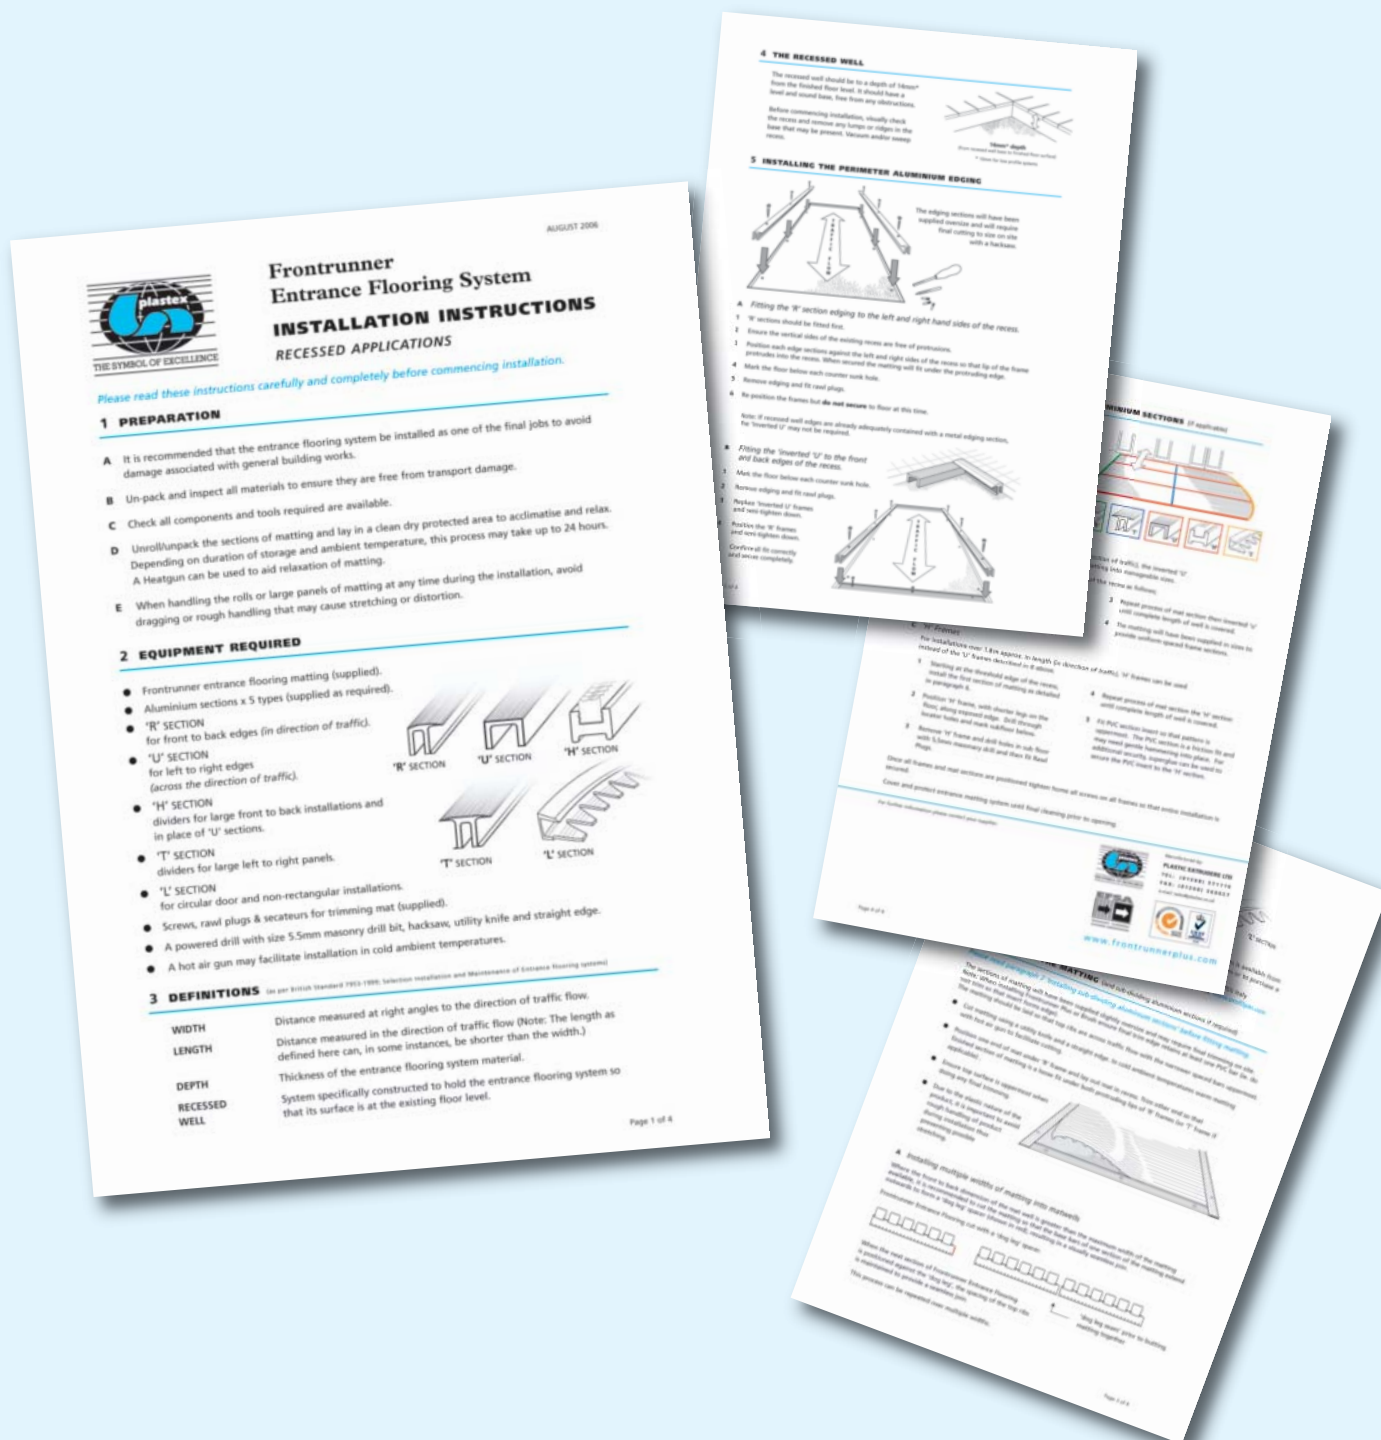

Recessed Installation Instructions

No advance templating is required

The Fronrunner Entrance Flooring System uses a simple but effective framing method, which is installed at the same time as the entrance flooring. As the system is supplied in rolls, the installation is quick and easy and does not require any advance templating. Additional visits to site for fitting the matwell frame when the floor slab is poured are also not required.

A range of frames are utilised where large areas of matting are to be installed. The frames are used to divide, cap and secure ends or form shaped edges where required (see page 58).

The simplicity of the Fronrunner Entrance Flooring System allows it to be installed by competent tradesmen. Easy to follow instructions are included with each delivery.

Entrance matting surface mounted ancillaries

Frontrunner Entry & Frontrunner Plus

14mm x 60mm x 10.1m

Surface Mounted Installation Instructions

Easy to follow instructions

Fitting PVC or aluminium ramped ancillaries and connector clips is quick and simple.

Instructions are included with each delivery.

Cleaning Guidance

Fronrunner is also very easy to clean within normal cleaning schedules and doesn't require bespoke cleaning products.

Full cleaning instructions come with Fronrunner when delivered or are available at www.plastexmatting.com/fronrunner-cleaning.html

Warranty on Fronrunner Entrance Flooring Systems

Fronrunner entrance flooring systems are very durable and many of the installations shown in this brochure have been in place for over ten years and are still performing with admirable style and service. This applies to large retail centres with all the heavy footfall traffic, where we confidently offer a 2-4 year warranty on all of the Fronrunner range.

Full warranty statement:

Why multi-purpose floor coverings?

When you need form and function for larger floor areas the Plastex Multi-Purpose range provides comfort, safety, style and cleanliness as well as protection for floor, bench and components.

2 formats - large one piece covering by standard rolls up to 1.5m (5') x 25m (82') or interlocking tiles.

How to choose your multi-purpose mat

Colour & Design

Often in larger areas colour is an important factor: After all floors usually make up the largest area of single colour in any interior design. Plastex has an extensive range of colours and patterns to choose from.

Surface pattern is important for several reasons...

Dot Pattern

As a rule of thumb the higher the dot the greater the grip, the smaller the dot the easier it is to clean and for trolley wheels to cross. Also design perspective comes into play – big dots make rooms look smaller; small dots make rooms look bigger. We produce mats with three sizes from big to small - coin, button and dot.

DOT PATTERN						
PRODUCT	PAGE	DOT SIZE	COLOURS	THICKNESS	SPILLAGE	USAGE
Flexi Dot	66	2			Contemporary small dot pattern
Flexi Dot Extra	66	2			Contemporary small dot pattern for heavier traffic areas
Eco Dot	66	2			Contemporary small dot ecological pattern
Eco Dot Extra	66	2			Ecological pattern for heavier traffic areas
Flexi Coin	67	● ● ● ●	1			Large stud vinyl alternative
Eco Coin	67	● ● ● ●	2			Large stud vinyl ecological alternative
Flexi Button	68	● ● ● ●	2			Heavy duty deep stud flooring

Ridge Pattern

Striped surfaces provide a bit of extra comfort and can deal better with spillage. We have grooved stripe products for extra grip.

RIDGE PATTERN						
PRODUCT	PAGE	PATTERN SIZE	COLOURS	THICKNESS	SPILLAGE	USAGE
Flexi Tred	69		4			Heavy duty ribbed matting suitable for use where electrical safety is required
Flexi Line	70		3			Fine ribbed matting designed for areas alongside or on top of benches
Flexi Ridge	71		2			Hard wearing ribbed matting with high component & noise protection

Open Grid Pattern

For areas with the likelihood of heavy spillage our Plastex Grid and Plastex Lok products provide comfort and support for both chemical and non-chemical environments.

GRID PATTERN						
PRODUCT	PAGE	GRID	COLOURS	THICKNESS	SPILLAGE	USAGE
Plastex Grid	74	Open	5	25mm (1")		Heavy duty rigid grid tiling for where large volumes of liquid require efficient dispersal
Plastex Grid	74	Closed	2	25mm (1")		Heavy duty rigid grid solid surface tiling for coverage of large areas
Plastex Lok	73	Open	1	16mm (5/8")		Heavy duty open grid 100% recycled PVC tiles
Plastex Chex	72	Closed	1	14mm (4/9")		Heavy duty solid surface 100% recycled PVC tiles

Durability

The thicker the mat the longer it wears - so take the amount of traffic into account. Of course the thicker mats also provide more protection for floors, benches and components.

Environment

All the above products are 100% recyclable and made from 100% DINP (REACH compliant) PVC, including recycled versions ("Eco" products, Plastex Lok and Plastex Chex).

PROTECTION

Contemporary small dot pattern

A light duty, attractive vinyl in a choice of colours with a dot pattern as a main feature.

More than just attractive, but also highly functional, Flexi Dot performs well and the roll format enables large area coverage with a minimum of seams/joints.

BENEFITS

- Good slip resistance
- Chemical, oil and acid resistant
- Easy to cut on site, contours to uneven surfaces
- Quick to install
- Environmentally-friendly
- Fire resistant

FEATURES

- Dot pattern surface
- Vinyl sheets in roll format
- Made from flexible PVC
- Supplied in convenient roll formats
- 'Eco' version manufactured from reprocessed factory waste

The large stud vinyl alternative

Attractive large stud vinyl floor covering also available in 'eco' version.

Large areas can be covered economically using just one piece of material in 98cm (3'2") or 150cm (5') widths. This multi-purpose product is a practical and functional alternative to conventional floorings in many light duty applications.

BENEFITS

- Good slip resistance
- Chemical, oil and acid resistant
- Easy to cut on site, contours to uneven surfaces
- Quick to install
- Environmentally-friendly
- Fire resistant

FEATURES

- Large stud design
- Vinyl sheets in roll format
- Made from flexible PVC
- Supplied in convenient roll formats
- 'Eco' version manufactured from reprocessed factory waste
- EN 13501 - I : 2007- Bfl - S1

FLEXI BUTTON

Heavy duty deep stud floor covering

A multi-purpose, heavy duty sheet vinyl for commercial and medium duty industrial applications.

The distinctive deep stud design is not only an attractive feature but also practical. Flexi Button is easy to clean, slip resistant, chemical, oil and acid resistant and formulated to cope with light spillages.

BENEFITS

- Good slip resistance and hardwearing
- Chemical, oil and acid resistant
- Easy to cut on site, contours to uneven surfaces
- Quick to install
- Fire resistant

Heavy duty ribbed matting

Providing electrical resistance and enhanced safety for demanding applications.

A durable, chemical resistant sheet vinyl with a textured broad rib surface for enhanced safety. Flexi Tred insulates from the dangers of electric shock and meets DIN/EN 60243-1 with a breakdown voltage of 27kv.

BENEFITS

- Good slip and wear resistance
- Insulates from electric shock
- Chemical, oil and acid resistant
- Easy to cut on site, contours to uneven surfaces
- Quick to install
- Fire resistant

FEATURES

- Textured broad rib surface
- Breakdown voltage of 27kv
- Vinyl sheets in roll format
- Made from flexible PVC
- Supplied in convenient roll formats

Fine ribbed matting

Fluted surface resists oils, chemicals and acids.

The practical alternative to conventional rubber runners, Flexi Line is a fine ribbed vinyl matting designed for areas alongside or on top of benches. Flexi Line has a slip resistant fluted surface and dense composition to reduce the impact of noise and/or vibration.

BENEFITS

- Good slip resistance
- Chemical, oil and acid resistant
- Easy to cut on site, contours to uneven surfaces
- Quick to install
- Fire resistant

PLASTEX CHEX

100% recycled heavy duty checker plate PVC tiles

Plastex Chex is a hard wearing tiling system, delivering long life and value for money.

It can be used as a temporary or permanent flooring solution for coverage of large areas in the workplace, such as work stations, finishing/assembly areas, laboratories, localised workcells and machine shops.

Plastex Chex solid surface absorbs shock and noise as well as being resistant to chemicals and extreme temperatures.

BENEFITS

Slip resistant and noise reduction properties

Insulating and resistant to chemical, oil and acid

Quick to install

Environmentally-friendly

100% recycled heavy duty open grid PVC tiles

Plastex Lok is a hard wearing open grid tiling system, delivering long life and value for money.

It can be used as a temporary or permanent flooring solution for coverage of large areas in the workplace with the likelihood of heavy spillage, such as work stations, finishing/assembly areas, laboratories, localised work cells and machine shops.

Plastex Lok's pimpled open grid surface guarantees excellent slip resistance (DIN 51130 R12) and, at the same time, facilitates drainage (DIN 51130 V10) and soil removal.

BENEFITS

- Certified slip resistance **DIN 51130: R12**
- Excellent drainage **DIN 51130: V10**
- Chemical, oil and acid resistant
- Easy to cut on site, contours to uneven surfaces
- Quick to install
- Environmentally-friendly

FEATURES

- Pimpled surface
- Raised construction
- Non-porous PVC (impermeable to fluids)
- Made from flexible PVC
- Interlocking tiles
- Made from 100% recycled material

PLASTEX GRID

Heavy duty rigid grid tiling

A versatile flooring solution in multiple industrial applications.

Rigid polyethylene grid tiles with a secure, quick and easy 'lock-fit' connection, Plastex Grid provides a raised floor surface standing 25mm (1") above ground.

BENEFITS

- Open grid or solid grid design
- Good slip resistance
- Resistant to detergents, industrial chemicals and acids
- 25mm (1") high surface
- Effective coverage of large areas

FEATURES

- Open grid for removal of large volumes of liquid
- Textured surface
- Made from rigid polyethylene
- Withstands weights of up to 50 T/m²
- Secure 'lock fit' connection

Matting and tiling floor covering applications & ancillaries

One Piece Covering

If you have a large floor area and are looking for a one-piece covering or runner, look no further than our multi-purpose flooring range.

We can manufacture a standard width roll to any length you specify.

The only thing to bear in mind is, when it comes to fitting for larger areas, weight may be an issue; for example a 30m (100') roll of Flexi Tred weighs about 125kilos (275lbs).

Loose Lay or fixed

Plastex multi-purpose flooring also offers you the versatility of choosing between loose lay or permanent fixing. Loose lay is the perfect instant solution to dirty or unfinished floors.

For the longer-term, our range of colours and surface patterns allows you to include our multi-purpose matting as fixed design feature.

You'll find the matting can be readily cut and shaped on site, and once stuck down, is an elegant and long lasting design solution.

Plastex Grid

25mm x 66mm x 2m
(1" x 2 3/4" x 6'6")

66mm PVC aluminium strip

Supplied in sections of 2m (6'6") length with fixing screws and plugs

Colours: Anodised aluminium

Plastex Chex

12mm x 50mm x 500mm
(1/2" x 2" x 1'8")

50mm PVC edging strip

Supplied in 50cm (1'8") lengths.

Colours: Black, Yellow

Plastex Lok

12mm x 50mm x 500mm
(1/2" x 2" x 1'8")

50mm PVC edging strip

Male and female strips available.

Supplied in 500mm lengths (1'8").

Colours: Black, Yellow

Connector clips - end to end

For joining two ends of the edging together. One lug is supplied for every two pieces of edging in the relevant colour.

Colours: Black, Yellow

Specialist

APPLICATION MATTING

Why specialist matting?

With over 50 years of experience, customers have often requested our knowledge to research and develop matting products to meet specific needs. This section showcases a few of the most common 'special' matting solutions we have developed to meet various customer requests.

Wave Simulator Matting - p77

PillogriD - large space hollow tube for maximum cushioning and drainage.

Animal Cage Matting - p81

HVD - smooth yet hardwearing with good cushioning & drainage properties. Ideal in veterinary applications.

Roof Walkway Matting - p78-79

Crossgrip PVC and Crossgrip TPO - slip resistant and self draining high level mats for safe access in all weathers and roof membrane protection.

Cushioning Matting - p82

Pillomat - lightweight, hygienic cushioned matting suitable for bench tops, working surfaces and shelving. Impact, chemical, oil and acid resistant.

ESD Matting - p83

Zed Land ESD - superior quality, patented foam matting for standing areas in static sensitive environments.

Escape Route Matting - p80

Heronair Photoluminescent - escape route matting with a light emitting strip to mark escape routes if lighting fails.

Cushioning matting for wave simulators

A large open grid and soft vinyl with hollow profile that combines phenomenal drainage with a soft landing.

Placed over metal grates at the back and front of surfing machines, PillogriD matting was specifically developed to provide excellent drainage and superior cushioning for aquatic safety.

Large roll format further adds to safety by removing the need for joints in action areas.

This matting can be supplied in factory welded panels for quick and easy installation.

BENEFITS

- Soft landing
- High volume drainage
- Highly resistant
- Easy to cut on site, contours to uneven surfaces
- Quick to install
- UV resistant
- Hard wearing
- Hygienic

FEATURES

- Hollow tube construction
- Large open grid format
- "D" profile for maximum weld strength
- Made from flexible PVC
- Supplied in rolls or fabricated panels
- Can be used indoor or outdoor
- All welded construction
- All flexible PVC construction

CROSSGRIP PVC

Roof walkway matting in PVC material

A two layer roof walkway matting that protects the roof membrane and provides safe access for general maintenance works. Compatible with various roof membranes.

Made from non-porous PVC with cross directional top ribs and a 'diamond cut' surface for a firm underfoot grip, Crossgrip PVC carries a high R10 slip resistant rating under DIN 51130.

Impermeable in all weathers, Crossgrip is highly specialised matting system for flat roofs, gantries and high level walkways. When laid flat, it will remain stable in winds up to 60 mph-96 km/h*.

BENEFITS

Certified slip resistance **DIN 51130: R10** **ASTM 1677: 0.6/0.5**

Excellent drainage **DIN 51130: V10**

CROSSGRIP TPO

Roof walkway matting in TPO material

A roof walkway matting compatible with TPO, EPDM, PVC and modified bitumen roofs.

The product additionally gives continuous protection to roofing membranes from damaging weather, pedestrian traffic, tools and machinery.

Designed for use on flat roofs, CrossgripTPO's 12mm (1/2") one piece welded open grid design offers permanent slip resistance, even in areas where water may pool.

BENEFITS

Certified slip resistance **DIN 51130: R9**

Excellent drainage **DIN 51130: R10**

HERONAIR PHOTOLUMINESCENT

Escape route matting with glow properties

Photoluminescent centre strip marks escape routes after ambient light failure.

Manufactured to the same specification as Heronair and incorporating a 10cm photoluminescent strip, this light emitting band marks escape routes if lighting fails.

Heronair Photoluminescent is tested to DIN 67510 Part 1 after glow properties (33.9/4.4-588/w-k).

Especially suitable for open grid and metal checker plate surfaces.

BENEFITS

Certified slip resistance **DIN 51130: R11 - ASTM 1677: 0.6/0.6**

Excellent drainage **DIN 51130: V10**

Animal cage matting

A top performer where comfort and cleanliness count.

HVD is a simple to cut and fit vinyl matting with a particularly smooth upper surface, which provides an extremely high level of cushioning and drainage, whilst also being hygienic, comfortable and easy to clean.

As a result of this special combination of benefits, HVD is ideal for lining kennel cages and is widely used in veterinary clinics and kennels.

BENEFITS

Warm and comfortable

High drainage

Easy to clean

Easy to cut on site, contours to uneven surfaces

Quick to install

*Contact us for bespoke dimensions.

Cushioning matting

Cushioned matting for covering of work and storage surfaces. A bonus wherever delicate components and tools are stored or handled.

Pillomat is an all-purpose cushioned matting of tubular construction with air-filled hollow sections providing a lightweight working surface matting solution, which is ideal for a wide variety of industries - from marine compartments to general manufacturing where it is widely used on bench tops.

BENEFITS

- Component protection
- Good drainage
- Hygienic and easy to clean
- Easy to cut on site, contours to uneven surfaces
- Quick to install
- Fire resistant

FEATURES

- Extra smooth surface and tubular construction
- Open grid
- Non-porous PVC (impermeable to fluids)

Patented foam construction with ESD properties

Made from high molecular density foam with 'bounce' properties up to 4 times as effective as standard foam matting for improved comfort and productivity.

Standing employees working on Zed Land will feel better and have improved productivity. Dropped components will also be protected from accidental damage. Zed Land will not deaden and shows minimal wear after 2000 taber abrader cycles in test conditions to ASTM D4060.

BENEFITS

- Certified wear resistance **ASTM 4060: $\leq 1.5\%$ ***
- Good slip resistance
- Excellent standing fatigue reducing properties will boost productivity
- Easy to cut to shape and quick to install
- Provide underfoot comfort in static sensitive environments

FEATURES

- Minimal wear standing foam which will not deaden
- Embossed pebble surface
- Patented vinyl foam construction with superior resilience
- Supplied in 18m rolls or standard modules
- Electrostatic dissipative (ESD) properties
- Certified **ASTM D257: 10^9**

PillogriD

5m (16') on the shorter of 2 dimensions x physical weight of panel @ 7.1 kg/sq.m (1.45 lb/sq.ft)

Bespoke size panels

Plastex can supply simulator machine manufacturers with prefabricated robot welded panels. The maximum dimension of these panels is 5m (16') on the shorter of the length or width. Consideration should also be given to handling and shipping of the overall weight of the fabricated panel. PillogriD weighs 7.1kg/sq.m (1.45lb/sq.ft).

Zed Land ESD

10.5mm x 1.8mm
(9/16" x 5/11")

Snap Track (Low Profile)

2 part low profile snap track can be welded to join rolls end to end or side to side for large area covering.

Supplied with welding paste.

Colour: Dark Grey

ESD Screw Fit Earthing Lead

Supplied in 4.5m (14'9") lengths

Extensive know-how

When you buy from Plastex, you buy with the confidence of knowing we have been designing and manufacturing matting for a diverse range of uses for over 50 years.

We even design and build the machines we use for manufacturing matting

***‘tell us what you need
...and we’ll make it ’***

At Plastex we realise not every flooring need can be solved by an off the peg solution. As EU & USA manufacturers we are here to help, as we can design and manufacture a product to your exact specification.

Full manufacturer warranty - another good reason to choose Plastex

All Plastex flooring and matting products will give excellent and long service. In the unlikely event of a Plastex product being faulty, we offer a full refund or replacement warranty. The warranty periods vary depending on the product, you can find full terms and details at
